

SCIENTIST SPOTLIGHT

Discover how science works alongside researchers at Scientist Spotlight at Pacific Science Center.

Held on the first Saturday of every month, Scientist Spotlight provides personal interactions in an informal setting where three to five researchers demonstrate and discuss their work face-to-face with Pacific Science Center guests. Here, curious minds of all ages learn how scientists detect cancer-causing genes, estimate fish populations, investigate the geology of Mars and more!

This program exclusively features Pacific Science Center Science Communication Fellows. Fellows are local science and technology-based professionals who are trained in communication and committed to sharing their love of science with you. Featured Fellows vary each month so come often to learn more from different fields!

Entry to Scientist Spotlight is included with the price of general admission— FREE for Pacific Science Center members.

Check out our website, pacificsciencecenter.org for upcoming event dates and topics.
